The Mission of Kutaisi University

About the Document

The present document is the strategy development plan of University of Kutaisi LLC, which defines the main aspects of development of the University as the holistic institution together with its separate structural units, according to the mission, vision and values of the University.

The mission of the University:

- Preparation of the workforce with the conformable competence and education that would comply with the international, national and regional labor market requirements, who would contribute to development of ethical and socially responsible society as well as of the corresponding sphere and bring their own merits to the economic prosperity of our country.
- Strengthening of the academic society on the local level. Contribution to generating the new knowledge and its sharing, taking into consideration the resources of the university and the specifics of the region.

Values:

University of Kutaisi shares the contemporary European and universal values and those defined by the Great Charter of the European universities. The values of the University are based on respect of academic freedom, principles of contribution to critical, analytical, progressive and creative thinking, in addition, on freedom of word, thought and expression, on respect for the main human rights and freedoms, on prohibition of all forms of discrimination, on principles of protection of academic ethics and good faith.

Vision:

By the year 2027, University of Kutaisi will be the academic institution of the regional and national importance, which will ensure the following:

- Higher educational programs that would be in compliance with the economic specifics of the region and the labor market, as well as in tact with the academic necessities of the country and the society providing the high degree of internationalization on all three levels of the higher education;
- Possibility of implementation of research projects of the regional, national and international importance, generating and disseminating the new knowledge;
- Forming the Expertise Centre of the regional and national significance that will contribute to sharing of the gathered knowledge to the wide audience and to the process of democratization and economic prosperity of the State.
